

Learning transforms Management

There are many resources that support management operations, but it's often noted that personnel training is the most important of all management resources. SATT, Inc. makes full use of both the latest information technology and conventional group training to provide our clients with "learning solutions" for effective and efficient personnel training.

Our mission is to develop and provide "learning solutions" for our clients that will contribute to the management of their organizations.

❖ Business Description

We believe that in-house training is vital to a company's future. Our divisions take a customer-oriented approach and work together seamlessly to provide support for our clients' learning programs to ensure that their projects are a success.

Sundai IT System Planning Division

Information system-based support to help students preparing for entrance examination gain entry to their first-choice school

We develop systems for the Sundai Group used to maintain its infrastructure and perform student guidance and reception work. We offer both hardware and software support for students preparing for entrance exams.

System Solution Division

Business project development success that started with the IT support we provided to government and academia

Based on our successful track record of providing IT support to government agencies, national universities and other organizations, we are engaged in a broad scope of activities centered around software, data input, staffing and hardware services.

Sales & Consulting Division <http://satt.jp/>

We think together with each customer in their viewpoint, to meet their demands

We provide consulting service, to enable a stronger effectiveness to IT educations.

From the introduction to improvement of Learning Systems, we stand together with each customer to give flexible and suitable support.

Training Development Division <http://m-school.biz/>

Use our unique take on education and e-learning into training programs

We aim to provide suitable training to meet the needs of every client by give consistent support in planning, developing and managing training programs. Our high quality training programs are combined with Sundai Groups' educational expertise and the technology of SATT.

Learning Service Division <http://zero.satt.jp/>

Provide clients with essential education products

Our learning solutions are tailored to the needs of our clients for maximum ease of implementation. Our planning services assist in making the shift from group training to web-based education programs and in proposing methods for creating web-based content.

Learning Solution Division

Wide range development of systems to contents, using Flash technology

Develop contents starting with LMS the open source for Learning Management Systems, onto other contents for PCs' and mobiles.

Web Design & Marketing Division

Design learning programs

Our comprehensive web designed products would be effective IT learning for our clients. We offer learning support from the side of web designing point of view.

Informative System Division

We operate and manage both hardware and software, and support system control for various businesses.
